No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                            US-09-939-853A-75

Sequence 7, Application US/09470881

Patent No. 6685938

GENERAL INFORMATION:
PAPLICANT: CHERESH, David A.
PAPLICANT: ELICEIRI, Brian

TITLE OF INVENTION: METHODS AND COMPOSITIONS USEFUL FOR MODULATION OF
TITLE OF INVENTION: ANGIOGENESIS AND VASCULAR PERMEABILITY USING SRC OR
TITLE OF INVENTION: YES TYROSINE KINASES

FILE REFERENCE: TSRI 651.2

CURRENT APPLICATION NUMBER: US/09/470,881

CURRENT FILING DATE: 1999-12-22

PRIOR APPLICATION NUMBER: PCT/US99/11780

PRIOR FILING DATE: 1999-05-28

PRIOR FILING DATE: 1998-05-29

NUMBER OF SEQ ID NOS: 8

SOFTWARE: PALENTIN VET. 2.0

SEQ ID NO 7

LENGTH: 4517

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             PCT-US93-06251-83

PCT-US93-06251-83

Sequence 83, Application PC/TUS9306251

GENERAL INFORMATION:

GENERAL INFORMATION:

TITLE OF INVENTION: Trivalent Synthesis of Oligonucleotides Containing

TITLE OF INVENTION: Stereospecific Alkylphosphonates and Arylphosphonates

TITLE OF INVENTION: Stereospecific Alkylphosphonates and Arylphosphonates

CORRESPONDENCE ADDRESS:

ADDRESSES: SCULLY, SCOTT, MURPHY & PRESSER

STREET: 400 Garden City Plaza

CITY: Garden City

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Sequence 1, Application US/07820011A

Patent No. 5336615

GENERAL INFORMATION:

APPLICANT: Bell, Leonard

APPLICANT: Madri, Joseph A.

APPLICANT: Warren, Stephen L.

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                              US-09-939-853A-75

3 Patent No. 6022704

4 GENERAL INFORMATION:
APPLICANT: Elliot, Kathryn J.
APPLICANT: Elliot, Kathryn J.
APPLICANT: Elliot, Steven B.
APPLICANT: Harpold, Michael M.
TITLE OF INVENTION: HUMAN NEURONAL NICOTINIC ACETYLCHOLINE
TITLE OF INVENTION: AZCEPTOR COMPOSITIONS AND METHODS EMPLOYING SAME
NUMBER OF SEQUENCES: 12
COMPESSORE: Brown, Martin, Haller & McClaim
STREST: 1660 Union Street
CUTY: San Diego
STATE: CA
COUNTRY: USA
STRET: GA
CONFUTER READABLE FORM:
MEDIUM TYPE: Diskette
COMPUTER: IBM COMPACIBLE
COMPUTER: PASTER: DS
SOFTWARE: FASTESEO Version 1.5
COMPUTER: APPLICATION DATA:
APPLICATION NUMBER: US/08/467,574
FILING DATE: June $, 1995
CLASSIFICATION: 536
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Query Match
